Transition Planning-SAMPLE Part B referred

The following information about transition is discussed beginning at the initial IFSP meeting:

- Transition happens when your child leaves early intervention. The planning on this page will help you and your child move smoothly from early intervention to whatever comes next for your child.
- Options after early intervention (examples: community programs like neighborhood nursery schools, Head Start, early childhood special education through the public schools).
- Possible timing of transition
 - When your child reaches age level in all developmental areas and meets no other eligibility requirements for early intervention
 - When your child reaches his/her third birthday, which is the end of eligibility for early intervention
 - When and if your child begins early childhood special education services through the public schools (between age 2 and 3), if you are interested in those services. Children may not be served in early intervention and early childhood special education through the public schools at the same time.

This information was discussed on 07/13/2023 by Kathleen Pierson
